

Can You Remember?

Module 4 – The Senses

For this activity you are to reproduce a diagram of your house into the box below. You need to include all the rooms and all the furniture you can remember. You will need to work out how things are different sizes and how far things are apart. Your scale is in footprints. This means if someone was to walk through your house they may need to know that the bathroom was 10 footsteps away from your bedroom.

You may need to complete a draft sketch a few times before making your final copy.

A large empty rectangular box for drawing a house diagram.
