

How Big Is it?

Module 4 – The Senses

For this activity you are going to make estimates and real measurements of how big, small, thin, wide, long, short, round an item is. You will look at each object and estimate what you think the measurement will be in hand spans and centimetres . You will then measure using your hands then a measuring tape or ruler to find the correct result. Record your answers below.

Item	Estimate handspan 	Real handspan 	Estimate centimetres 	Real centimetres 
 Whiteboard				
 School desk				
 Window				
 Workbook				
 Soccer ball
